fun & fast aquatic vehicles

## Presentation

***SUBALO*** is a small human powered friendly and funny aquatic vehicle, for beach, **water sports** and snorkelling.

By using ***SUBALO***, you can go **faster than swimming**, with equivalent effort.

No need for lessons. You can immediately sit down on it, put your feet on the pedals and start pedalling. You can then use your hands to steer or the inclination of your body.

***SUBALO*** allows you to perform "aquatic strolls", to cruise alongside a coral reef, a coast, and admire the flora and fauna of the aquatic world. All this without any risk, as ***SUBALO*** brings you about 25 kg of floatability, allowing your chest to be out of the water.

The practice of ***SUBALO*** results in a natural "aqua-gym", with a massage and relaxing effect of the water on your body, as well as fitness. It brings you wellness, contact with nature and a soft and pleasant approach of the aquatic world: sea, lake, river.

The propeller is located in a nozzle therefore there is very low risk for swimmers in the surroundings. Kids can easily enjoy ***SUBALO*** from 10 years old, if they know to swim and under constant adult supervision.

## Features

Length from 1,80 to 2,12 meters, easily adjustable by hand.

Height : 0,66 m

Width : 0,56 m

Weight : 17 kg

***SUBALO*** is delivered, already mounted, in a carton box of L = 1,29 W = 0,52 H = 0,56 m.

Total weight packed is 19 kg. It comes with "How to use" instructions.

The main parts include: sit, body, nozzle, propeller, mechanical box with pedals.

Maintenance is limited: rinse it with fresh water regularly while intensive use. After each season you should completely rinse it, and inject marine grease in the mechanical box once a year.

A part-list is available on demand.
