fun & fast aquatic vehicles

Presentation

VELOSUB is a small human powered aquatic vehicle, friendly and funny, for beach, water sports and snorkelling.

By using **VELOSUB**, you can go **twice the speed of swimming or fins**, without effort.

No need for lessons. You can immediately lie down on it, putting your chin or chest on the front float and start to pedal. You can then steer by using your hands or inclination of your body.

Because it easily increases your speed in the water and your range, **VELOSUB** allows you to perform "aquatic stroll" along the coast, to follow schools of fish effortlessly, to swim alongside a coral reef, a coast and admire the flora and fauna of the aquatic world: sea, lake or river.

All this, without risk, as **VELOSUB** brings you about 15 kg of floatability.

The propeller is located in a nozzle so that there is very low risk for others swimmers.

Kids can easily enjoy **VELOSUB** from about 10 years, if they know to swim and under constant adult supervision.

Features

Length from 2,00 to 2,25 meters, easily adjustable by hand.

High : 0,55 m

Width : 0,42 m

Weight : 14 kg

VELOSUB is delivered, already mounted, in a carton box of L = 1,29 W = 0,51 H = 0,57 m.

Total weight packed is 17 kg.

It comes with "How to use" instructions.

The main parts include: front float, body, nozzle, propeller, mechanical box with pedals.

Maintenance is limited: daily rinse it with fresh water while intensive use period. After each season you should completely rinse it, and inject marine grease in the mechanical box once a year.
